- Total proposed exposure to Securitized debt for Scheme (s) is mentioned under asset allocation of respective Scheme(s).
- In case of mutual fund Schemes entering into repo transactions, in corporate debt securities at any point in time, the gross exposure of the concerned Scheme(s) to repo transactions (including reverse repo) in corporate debt securities shall not be more than 10% of the net assets of that Scheme(s). At any point in time, the gross exposure of such Scheme(s) to repo transactions (including reverse repo) in corporate debt securities of a single issuer shall not be more than 5% of its net assets.
- The Scheme(s) may engage in short selling of securities in accordance with the framework relating to Short Selling and securities lending and borrowing specified by SEBI except IGF, IGFOF, ILTVF, IDYF and IHF. The Scheme may also participate in securities lending to augment its income except IGF, IGFOF, INIF and INJIF.
- Securities lending in the Scheme will be in accordance with the guidelines on securities lending and borrowing Scheme issued by SEBI from time to time. The Scheme shall not deploy more than 20% of its net asset in securities lending and not more than 5% in securities lending to any single counterparty.
Securities lending in the Scheme will be in accordance with the guidelines on securities lending and borrowing Scheme and modifications issued by SEBI from time to time such as circular no. MRD/DoP/SE/Dep/Cir-14/2007 dated December 20, 2007 circular no. MRD/DoP/SE/Cir- 31/2008 dated October 31, 2008, circular no. MRD/DoP/SE/Dep/Cir- 01/2010 dated January 06, 2010, circular No.CIR/MRD/DP/33/2010 dated October 07, 2010 and circular no. CIR/MRD/DP/30/2012 dated November 22, 2012.
- Short-term fixed deposits shall be held in the name of the Scheme(s) and the duration of such fixed deposit shall not exceed 91 days from the date of deposit.

Other Considerations

- Pending deployment of funds of Scheme(s) as per the investment objective of the Scheme(s), the AMC may park the funds of the Scheme(s) in short term deposits of the Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI from time to time.
- Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the asset allocation pattern will be for short term and defensive considerations.
- In the event of asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will endeavour to review and rebalance the same within 30 days. If the rebalancing is not completed within the 30 days, the details of such instances will be reported to the Trustees for taking necessary remedial measures.
- Though every endeavour will be made to achieve the objectives of the Scheme(s), the AMC / Sponsors / Trustees do not guarantee that the investment objectives of the Scheme(s) will be achieved.
- No Guaranteed returns are being offered under the Scheme(s).

Risk Factors

Common Scheme Specific Risk Factors

- The Trustees, AMC, Mutual Fund, their Directors or their Employees shall not be liable for any tax consequences that may arise in the event that the Scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- The tax benefits described in the SID / KIM are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme(s) will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his / her / its own professional tax advisor.

3. Redemption by the Unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, their directors or their employees shall not be liable for any tax consequences that may arise.
4. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distribution. All dividend distribution is subject to the availability of distributable surplus and would depend on the performance of the Scheme(s) and will be at the discretion of the AMC and Trustee Company.
5. Trading volumes and settlement periods may inherently restrict the liquidity of the Scheme's investments. In the event of an inordinately large number of redemption requests, or of a restructuring of the Scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.
6. Different types of securities in which the Scheme / plans would invest as given in the SID carry different levels of risk. Accordingly the Scheme's / plan's risk may increase or decrease depending upon the investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risk than bonds, which are AA rated.
7. The Sponsor is not responsible for any loss or shortfall resulting from the operations of the scheme beyond the initial contribution of Rs. 20 lakhs made by it towards setting up the Fund and/or such other accretions/additions to the same made from time to time.
8. **Risks associated with investments in Debt and Money Market instrument / bonds / Gilt Securities**
 - **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations. IDBI Gilt Fund is a dedicated Gilt Scheme; the Scheme is not exposed to credit risk.
The AMC seek to manage credit risk by restricting investments only to investment grade securities. Regular review of the issuer profile to monitor and evaluate the credit quality of the issuer will be carried out.
 - **Interest rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate / depreciate if the interest rates fall / rise.
Interest rate risk mitigation will be through active duration management at the portfolio level through regular monitoring of the interest rate environment in the economy. ILIQF and IUSTF are low duration products. Depending on the prevailing interest rate environment duration of ISTBF, IDBF and IGF will be actively managed to generate optimal risk adjusted return.
 - **Liquidity risk:** The liquidity of a bond may change depending on market conditions leading to changes in the liquidity premium linked to the price of the bond. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.
The AMC will endeavour to mitigate liquidity risk by mapping investor profile and potential redemption expectations into the portfolio construction to allow the Scheme to liquidate assets without significantly impacting portfolio returns.
 - **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
The AMC will endeavour to manage this risk by diversifying investments in instruments with appropriate maturity baskets.
9. **Risks associated with Investing in derivatives (not applicable to IGFOF, IGF & IEAF)**
Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
The risks associated with the use of derivatives are different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
The equity schemes may take exposure to derivative instruments for such purposes as may be permitted under the Regulations including hedging and portfolio balancing. The equity Scheme's exposure to derivative shall be in accordance with the guidelines and limits stipulated under SEBI circular DNP/ Cir- 29/2005 dated September 14, 2005, SEBI Circular DNP/ Cir-30/2006 dated January 20, 2006 and DNP/ Cir-31/2006 dated September 22, 2006 and SEBI Circular Cir/IMD/DF/11/2010 dated August 18, 2010. Any Notifications, Guidelines and circulars introduced by SEBI on derivatives from time to time shall automatically apply and forms part of the Scheme Information Documents.
There are certain risks inherent in derivatives. These are:
 - **Price risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
 - **Default risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
 - **Basis risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.
 - **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
 - **Liquidity risk** pertains to how saleable a security is in the market. All securities / instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.
The AMC will monitor the overall economic and credit environment including the systemic liquidity on a regular basis and the outlook will be integrated into the risk control and monitoring of the Scheme to control the risk emanating from derivative investments.
10. **Risks associated with Short Selling (not applicable to IGF & IGFOF, ILVTF, IDYF and IHF)**
Short Selling: When the scheme engages in short selling, it will borrow the security from a third party with the understanding that the security will be returned at a later date as and when required by the lender. Short selling a security demonstrates a negative view on a particular security (i.e. an expectation that the stock price will fall in future). However, there is a risk that the stock price may go up contrary to expectations which will result in losses to the Scheme. The losses will be realized to the Scheme if the Scheme may be forced to buy the shares in the market at the prevailing higher market price (than the price at which sold initially) to return the security to the lender if so required by the lender.
11. **Risks associated with Securities Lending (not applicable to INIF, INJIF, IGF & IGFOF):**
There are risks inherent to securities lending, including the risk of failure or bankruptcy of the counter party, leading to non-compliance with the terms of the agreement by the counterparty. Such failure can result in the possible loss of rights to the collateral, the inability of the counterparty to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon.
12. **Risks associated with investing in Securitized debt (Applicable only to ILIQF, IUSTF, IDBF, ICRF, IMF, ISF, IHEF, IESF, IHEF and IB&FSF)**
Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. For INIF and INJIF, kindly refer respective Scheme Information Document of the scheme. The risks associated with investing in such instruments are:
Limited recourse: The instruments represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the buyer of the security against the Investors' Representative.

Delinquency and Credit risk: Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Monthly Investor Payouts to the Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Vehicle / Asset. However many factors may affect, delay or prevent the repossession of such Vehicle / Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Vehicle / Asset may be sold may be lower than the amount due from that Obligor.

Risks due to possible prepayments: Full prepayment of a contract may lead to an event in which investors may be exposed to changes in tenor and yield.

Bankruptcy of the originator or Seller: If the service provider becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that either the sale from each Originator was not a sale then an Investor could experience losses or delays in the payments due under the instrument.

Liquidity risk: There is no assurance that a deep secondary market will develop for the instrument. This could limit the ability of the investor to resell them.

13. Risks associated with investing in unrated securities (Applicable only to IDYF, IHF, ILTV F, IESF, IHEF, ILIQF & debt Schemes excluding IGF)

Investing in unrated securities will be riskier compared to investment in rated instruments due to non availability of third party assessment on the repaying capability of the issuer. Any investment in unrated securities will be carried out only after obtaining the general approval from Board of Trustees and Board of AMC. The Mutual Fund will carry out internal rating exercise for all unrated instruments in which the Fund Manager plans to make investments and assign a proxy rating. Investments in unrated instruments will only be made in instruments with proxy rating of A1 / AA- or above.

14. Risks associated with investment in equity and equity related instruments (Applicable to INIF, INJIF, IIT100EF, , IEAF, IFF, IMF, ISF & IHEF, IESF, IHF AND IDYF)

Investments in equity and equity related instruments includes stocks and shares of companies, foreign currency convertible bonds (FCCB), derivative instruments, like stock future/options and index futures and options, equity warrants, convertible preference shares etc. as may be permitted by SEBI/RBI from time to time. These instruments are exposed to and can be impacted by adverse changes in interest rates, currency rates, inflation, liquidity (trading volumes and settlement) as well as company specific risks like corporate governance issues, changes in technology, financial distress etc.

15. Risk Factors specific to Index Funds (INIF & INJIF)

- I. The NIFTY 50 Index is a broad market index while the NIFTY Next 50 Index is an index comprising the next rung of 50 most liquid securities after NIFTY 50 Index. Any significant political, economic or a global event or a general downturn in the economy can have an adverse impact on the performance of the Indices and thereby, the Schemes.
- II. INIF / INJIF are passively managed Schemes that will closely track the NIFTY 50 Index / NIFTY Next 50 Index respectively. The Schemes will continue to hold a particular stock in the portfolio at the same weight as in the index irrespective of the fundamental view that the Fund Manager may have regarding the particular stock as long as the stock is a constituent of the index.
- III. The performance of the NIFTY 50 Index / NIFTY Next 50 Index will have a direct bearing on the performance of INIF / INJIF respectively. Hence any composition change made by the index service provider in terms of weightage or stocks selection will have an impact on the performance of the Schemes.
- IV. In the event the NIFTY 50 Index / NIFTY Next 50 Index is dissolved or is withdrawn by IISL or is not published due to any reason whatsoever, the investment objectives of the Scheme may not be realized.
- V. Tracking errors are inherent in any index fund and such errors may cause the Scheme to generate returns, which are not in line with the performance of the designated index. Such deviation in returns may arise due to several factors including but not limited to:
 - i. Any delay experienced in the purchase or sale of shares due to prevailing liquidity in the market, settlement and realization of sales proceeds and the registration of any security transfer and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them.
 - ii. The NIFTY 50 Index / NIFTY Next 50 Index reflect the prices of securities at close of business hours. However, the Fund may buy or sell securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the National Stock Exchange (NSE).
 - iii. IISL undertakes a periodic review of the stocks that comprise the NIFTY 50 Index / NIFTY Next 50 Index and may either drop or include new securities. In such an event the Fund will endeavour to reallocate its portfolio but the available investment / disinvestment opportunities may not permit precise mirroring of the NIFTY 50 Index / NIFTY Next 50 Index immediately.
 - iv. The potential for trades to fail, which may result in the particular Scheme not having acquired shares at a price necessary to track the index.
 - v. The holding of a cash position and accrued income prior to distribution and accrued expenses.
 - vi. Disinvestments to meet redemption, recurring expenses, dividend payout etc. as elsewhere indicated in this Scheme Information Document.

The Tracking Error that may arise in INIF and INJIF Schemes are expected to be around 2% respectively on an annualized basis. This is only an estimate and is expected to vary according to the recurring expenses incurred by the Schemes and other factors detailed above.

Important Note - INIF & INJIF (disclaimer by IISL)

- I. “The INIF / INJIF are not sponsored, endorsed, sold or promoted by India Index Services & Products Limited (“IISL”). IISL has no obligation or liability in connection with the administration, marketing or trading of the INIF / INJIF.
- II. IISL does not guarantee the accuracy and / or the completeness of the NIFTY 50 Index / NIFTY Next 50 Index or any data included therein and IISL shall have not have any responsibility or liability for any errors, omissions, or interruptions therein. IISL does not make any warranty, express or implied, as to results to be obtained by the IDBI Asset Management Limited, owners of the INIF / INJIF, or any other person or entity from the use of the NIFTY 50 Index / NIFTY Next 50 Index or any data included therein. IISL makes no express or implied warranties, and expressly disclaim all warranties of merchantability or fitness for a particular purpose or use with respect to the Index or any data included therein. Without limiting any of the foregoing, IISL expressly disclaim any and all liability for any claims, damages or losses arising out of or related to the INIF / INJIF, including any and all direct, special, punitive, indirect, or consequential damages (including lost profits), even if notified of the possibility of such damages.
- III. An investor, by subscribing or purchasing an interest in the INIF / INJIF, will be regarded as having acknowledged, understood and accepted the disclaimer referred to in Clauses above and will be bound by it.”

16. Risks associated with investment in ELSS (Applicable to IEAF)

In line with the provisions stipulated under the ELSS Scheme, 2005, units issued under IEAF including the units issued pursuant to dividend reinvestment will not be redeemed until the completion of 3 (three) years from the date of allotment of units. The ability of an investor to realize returns on investments in IEAF will consequently be restricted for the first 3 (three) years. Redemption can be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

17. Risks associated with repo / reverse repo transactions in corporate bonds and risk mitigation on strategies (applicable to ILIQF, IUSTF, ISTBF, IDBF, ICRF, IESF, IHEF, ILTVF and IEAF)

1. **Settlement risk** – Corporate Bond Repo will be settled between two counterparties in the OTC segment unlike in the case of Tri-part Repo transactions where CCIL stands as central counterparty on all transactions (no settlement risk). Settlement risk in reverse repo will be mitigated by requiring the counterparty (entity borrowing funds from the Mutual Fund) to deliver the defined collateral in the account of the MF before the cash is lent to the counterparty. Further, the IDBI Mutual Fund will also have a limited universe of counterparties comprising of Scheduled Commercial Banks, Primary Dealers, Mutual Funds and National Financial Institutions.

2. **Quality of collateral** – IDBI Mutual Fund will be exposed to credit risk on the underlying collateral – downward migration of rating. The IDBI Mutual Fund will mitigate this risk by a thorough in-house credit research on the quality of collateral with the objective to minimize instance of rating downgrades on collateral. The IDBI Mutual Fund will also impose adequate haircut on the collateral to cushion against any diminution in the value of the collateral. Collateral will require to be rated AAA or equivalent. IDBI Mutual Fund will also not accept as collateral, securities issued by the counterparties themselves.
3. **Liquidity of collateral** – In the event of default by the counterparty, the IDBI Mutual Fund would have recourse to recover its investments by selling the collateral in the market. If the underlying collateral is illiquid, then the IDBI Mutual Fund may incur an impact cost at the time of sale (lower price realization). The IDBI Mutual Fund seeks to mitigate this risk by imposing specific constraints on the collateral – issuer (PSUs / Financial Institutions etc.), tenor of the collateral (shorter maturity papers are more liquid than longer dated papers) on a case to case basis.

18. Risk specific to IGFOF

IGFOF will seek to invest predominantly in physical gold by investing exclusively in IDBI Gold Exchange Traded Fund. Accordingly, the Scheme specific risk factors as applicable to IDBI Gold Exchange Traded Fund (underlying Scheme) will be also applicable to IGFOF. Investors who intend to invest in the FoF Scheme are required to and deemed to have understood the risk factors of the underlying Scheme. The Scheme specific risk factors for IDBI Gold Fund are detailed below:

- a. The Scheme shall invest predominantly in IDBI Gold Exchange Traded Fund (IDBIGOLD). Hence the Scheme's performance shall primarily depend upon the performance of the Scheme.
- b. The price of gold and by extension, the NAV of the underlying Scheme and the FoF Scheme may fluctuate due to several reasons including but not limited to global macroeconomic events, demand and supply for gold in India and in the international markets, currency fluctuations, Interest rates, Inflation trends, regulatory restrictions on the import and trade of gold etc.
- c. The Scheme will subscribe to the underlying Scheme according to the value equivalent to unit creation size as applicable for the underlying Scheme. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in Reverse repo / short-term fixed deposits / Money market instruments and in IDBI Liquid Fund Scheme of IDBI Mutual Fund which will have a different return profile compared to gold returns profile. Alternatively, the units of the underlying Scheme may also be acquired through the secondary market route. The price quoted on the stock exchanges may differ from the underlying NAV, potentially leading to a higher acquisition cost.
- d. The units issued under the Scheme will derive liquidity primarily from the underlying Scheme having creation / redemption effected in creation unit size of 1 kg of physical gold and in multiples thereof. At times prevailing market environment may impact the ability of the underlying Scheme to sell gold against the redemption requests received leading to potential delay in redemption payout. In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests at times may be delayed.
- e. As the Fund of Funds (FOF) Scheme factsheets and disclosures of portfolio will be limited to providing the particulars of the Schemes invested only at the FOF level, investors may not be able to obtain specific details of the investments of the underlying Scheme. However, as the Scheme proposes to invest only in IDBI Gold Exchange Traded Fund (IDBIGOLD), the underlying assets of IDBI GOLD ETF will primarily be in physical gold.
- f. Investors in the FoF Scheme will bear recurring expenses and loads, if any, both at the Scheme level and also accruing at the underlying Scheme level. Hence the returns from the FoF Scheme may be lower when compared to what an investor would receive if he invests a similar amount directly in the underlying Scheme or physical gold.
- g. **Passive Investment** - Since the FoF Scheme will adopt a passive investment strategy, the Scheme will have at least 95% of its monies invested in the underlying Scheme and will stay invested regardless of the price of Gold or the future outlook for the metal. The Scheme's performance may be affected by a general price decline in the gold prices.
- h. **Tracking Error**: The Scheme may have to hold cash (not exceeding 5% of net assets) to meet ongoing recurring expenses, redemption requirements, delay in purchase of Gold, transactions costs, non-fulfilment of creation unit size etc. The performance of the Scheme may, therefore, be impacted by Tracking Error (deviation in the performance of the Scheme vis-à-vis the benchmark). However, the Mutual Fund shall endeavour to keep the annualized tracking error lesser than 2% (annualized) at all times.

19. Risks associated with investing in Liquid Funds offered by Mutual Funds:

To the extent of the investments in liquid mutual funds, the risks associated with investing in liquid funds like market risk, credit & default risk, liquidity risk, redemption risk including the possible loss of principal etc. will exist.

20. Risk Factors Associated with Investments in REITs & InvITs:

The below are some of the common risks associated with investments in REITs & InvITs.

Market Risk: REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

Liquidity Risk: As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Regulatory/Legal Risk: REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

Price-risk or Interest-rate risk: REITs & InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre-scheduled.

To mitigate the risks associated with investments in REITs & InvITs, the Scheme will invest in REITs/InvITs, where adequate due diligence and research has been performed by AMC. The AMC also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, Management, attending conferences and analyst meets and also teleconferences. The analysis will focus, amongst others, on the strength of management, predictability and certainty of cash flows, value of assets, capital structure, business prospects, policy environment, volatility of business conditions, etc.

21. Risks associated with segregated portfolio:

1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.
3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Further, no agents/distributors are entitled to sell units of mutual funds unless the intermediary is registered with Association of Mutual Funds in India (AMFI).

Employee Unique Identification Number (EUIIN): SEBI has made it compulsory for every employee/relationship manager/sales person of the distributor of mutual fund products to quote the EUIIN obtained by him/her from AMFI in the Application Form. EUIIN, particularly in advisory transactions, would assist in addressing any instance of mis-selling even if the employee/relationship manager/sales person later leaves the employment of the distributor. Individual ARN holders including senior citizens distributing mutual fund products are also required to obtain and quote EUIIN in the Application Form. Hence, if investments are routed through a distributor, please ensure that the EUIIN is correctly filled up in the Application Form. EUIIN is mandatory for non-advisory transactions (execution only) also, though the advice relating to the scheme or asset class is only incidental. However, in case of any exceptional cases where there is no interaction by the employee/sales person/relationship manager of the distributor/sub broker with respect to the transaction, investors are required to provide a duly signed declaration to this effect, as given in the Form.

Overseas Distributors: Overseas Distributors are exempted from obtaining NISM certification and AMFI registration.
