I. INTRODUCTION

A. RISK FACTORS

I. Standard Risk Factors

1. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
2. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending upon the various factors and forces affecting markets.
3. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
4. IDBI Gold Fund is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
5. The Sponsor is not responsible or liable for any loss or shortfall resulting from the operations of the scheme beyond the initial contribution of Rs. 10 lakhs made by it towards setting up the Fund and/or such other accretions / additions to the same made from time to time.
6. The above mentioned scheme offered by IDBI Mutual fund, is not a guaranteed or assured return scheme.

II. Scheme Specific Risk Factors

1. IDBI Gold Fund will seek to invest predominantly in physical gold by investing exclusively in IDBI Gold Exchange Traded Fund. Accordingly the Scheme specific risk factors as applicable to IDBI Gold Exchange Traded Fund (underlying Scheme) will be also applicable to IDBI Gold Fund. Investors who intend to invest in the Fund of Fund Scheme are required to and deemed to have understood the risk factors of the underlying scheme. The Scheme specific risk factors for IDBI Gold Fund are detailed below.
2. The Scheme shall invest predominantly in IDBI Gold Exchange Traded Fund (IDBIGOLD). Hence the Scheme's performance shall primarily depend upon the performance of IDBIGOLD. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme.
3. The price of gold and by extension, the NAV of the underlying Scheme and the FoF Scheme may fluctuate due to several reasons including but not limited to global macroeconomic events, demand and supply for gold in India and in the international markets, currency fluctuations, Interest rates, Inflation trends, regulatory restrictions on the import and trade of gold etc.
4. The Scheme will subscribe to the underlying scheme according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in Reverse

repo / short-term fixed deposits / Money market instruments and in IDBI Liquid Fund of IDBI Mutual Fund which will have a different return profile compared to gold returns profile.

Alternatively, the units of the underlying scheme may also be acquired through the secondary market route. The price quoted on the stock exchanges may differ from the underlying NAV, potentially leading to a higher acquisition cost.

5. The units issued under the Scheme will derive liquidity primarily from the underlying scheme having creation / redemption effected in creation unit size of 1 kg of physical gold and in multiples thereof. At times prevailing market environment may impact the ability of the underlying scheme to sell gold against the redemption requests received leading to potential delay in redemption payout.

In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests at times may be delayed.

6. As the Fund of Funds (FOF) scheme factsheets and disclosures of portfolio will be limited to providing the particulars of the schemes invested only at the FOF level, investors may not be able to obtain specific details of the investments of the underlying scheme. However, as the scheme proposes to invest only in IDBIGOLD, the underlying assets of IDBIGOLD will primarily be in physical gold.
7. Investors in the FoF Scheme will bear recurring expenses and loads, if any, both at the Scheme level and also accruing at the underlying scheme level. Hence the returns from the FoF Scheme may be lower when compared to what an investor would receive if he invests a similar amount directly in the underlying scheme or physical gold.
8. **Passive Investment:** Since the FoF Scheme will adopt a passive investment strategy, the Scheme will have atleast 95% of its monies invested in the underlying Scheme and will stay invested regardless of the price of Gold or the future outlook for the metal. The scheme's performance may be affected by a general price decline in the gold prices.

Tracking Error: The Scheme may have to hold cash (not exceeding 5% of net assets) to meet on-going recurring expenses, redemption requirements, delay in purchase of Gold, transactions costs, non-fulfilment of creation unit size etc. The performance of the Scheme may, therefore, be impacted by Tracking Error (deviation in the performance of the Scheme vis-à-vis the benchmark). However, the Mutual Fund shall endeavor to keep the annualized tracking error lesser than 2% (annualized) at all times.

9. The Trustees, AMC, Fund, their Directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.

Risk Factors specific to IDBI Gold Exchange Traded Fund (IDBIGOLD)

10. **Counterparty Risk:** There is no Exchange for physical gold in India. The Mutual Fund may have to buy or sell gold from the open market, which may lead to Counterparty risks for the Mutual Fund for trading and settlement. The Scheme does not intend to lend/lease Gold to third parties and all purchase/sale of Gold will be routed only through RBI nominated agencies/Banks permitted to import Gold into the country to mitigate counterparty risk.

11. **Liquidity Risk:** The Mutual Fund can sell gold only to bullion bankers/traders who are authorized to buy gold. Though, there are adequate numbers of players (nominated agencies/Banks) to whom the Fund can sell gold, the Scheme may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.

Trading in units of the scheme on the Exchange may be halted because of abnormal market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged

12. **Currency Risk:** The domestic price of gold will depend upon both the international market price of gold (denominated in US\$) as well as the conversion value of US dollar into Indian rupee. The formula for determining NAV of the units of the Scheme is based on the imported (landed) value of gold. The landed value of gold is computed by multiplying international market price by US dollar value. Investors will be exposed to fluctuations in the value of US dollar against the rupee as the Mutual Fund will not be hedging this risk exposure.
13. **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorized Participant to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell gold against the purchase and redemption requests received. Any measures introduced by government /RBI from time to time to curb the demand for gold can impact the ability of IDBIGOLD to purchase gold in the portfolio. In such cases, Scheme may have higher exposure to cash than the limit defined in the asset allocation pattern (maximum 5% of net asset)
14. **Asset Class Risk:** The returns from physical Gold may underperform returns from the securities or other asset classes and this may have an impact on the performance of the Scheme.
15. **Physical gold:** There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units. The Mutual Fund will ensure that the Gold held under the Scheme with the Custodian will be fully insured against the occurrence of such events.
16. **Passive Investment:** Since the Scheme will adopt a passive investment strategy the Scheme will have atleast 95% of its monies invested in Gold and gold related instruments and will stay invested regardless of the price of Gold or the outlook for the metal. The scheme's performance may be affected by a general price decline in the gold prices.
17. **Risk related to investment in Gold Monetization Scheme (GMS) of banks:** IDBI Gold Exchange Traded Fund will seek to invest in Gold Monetization Scheme (GMS) of banks. As the Scheme invests in such GMSs offered by Bank, Scheme lends the portion of gold holding to an Issuer of such GMS scheme. This may lead to the credit risk where Issuer of GMS is unable to return the principal physical gold to the Scheme upon maturity or in case of an early redemption. GMS (Gold Monetization Scheme), being an unlisted and non-transferrable security, can be redeemed only with the issuer and, hence, is subject to the risk of an issuer's inability to meet principal and interest payments on the obligation (credit risk).

The AMC will ensure adequate diligence prior to making investment in GMS of banks. Investments in GMS will be made in various tenors to minimize any asset liability mismatches. Prior approval of trustees will be obtained for each investment proposal in GMS.

18. Risks associated with investments in money market instruments

- i. **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest.

The AMC seek to manage credit risk by restricting investments only to investment grade securities. Regular review of the issuer profile to monitor and evaluate the credit quality of the issuer will be carried out.

- ii. **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.

Interest rate risk mitigation will be through active duration management at the portfolio level through regular monitoring of the interest rate environment in the economy.

- iii. **Liquidity risk:** The liquidity of a bond may change depending on market conditions leading to changes in the liquidity premium linked to the price of the bond. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.

The AMC will endeavour to mitigate liquidity risk by mapping investor profile and potential redemption expectations into the portfolio construction to allow the scheme to liquidate assets without significantly impacting portfolio returns.

- iv. **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

The AMC will endeavour to manage this risk by diversifying the investments in instruments with appropriate maturity baskets.

- v. **Settlement risk:** Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV. The AMC will endeavor to manage this risk by diversifying the investments in instruments with appropriate maturity baskets.

- vi. **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan. In case the Scheme does not have a minimum of 20 investors in a stipulated period, the provision of Regulation 39 (2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the scheme shall be wound up and the units would be redeemed at applicable NAV. The aforesaid conditions shall be complied within each subsequent calendar quarter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard. The 25% Exposure to the corpus of the scheme shall be calculated at the portfolio level.

i) **Factors affecting Gold Price**

Some of the key factors affecting gold prices (international and domestic) are as follows:

- **Central banks' sale:** Central banks across the world hold a part of their reserves in gold. The quantum of their sale in the market is one of the major determinants of gold prices. A higher supply than anticipated would lead to subdued gold prices and vice versa.

Central banks buy gold to augment their existing reserves and to diversify from other asset classes. This acts as a support factor for gold prices.

- **Producer mining interest:** Bringing new mines on-line is a time consuming and at times economically prohibitive process that adds years onto potential supply increases from mining production. On the other hand, lower production has a positive effect on gold prices. Conversely excessive production capacities would lead to a downward movement in gold prices as the supply goes up.
- **Macro-economic factors:** A weakening dollar, high inflation, the massive US trade deficits all act in favor of gold prices. The global trend of rising interest rates also had a positive impact on gold prices. Gold being regarded as a physical asset would lose its luster in a deflationary environment as gold is used effectively as an inflation hedge.
- **Geo political issues:** any uncertainty on the political front or any war-like situation always acts as a booster to gold prices. The prices start building up war premiums and hence such movements. Stable situations would typically mean stable gold prices.

- **Seasonal demand:** Since the demand for Gold in India is driven by household consumption, demand tends to be strong a few months ahead of these festive seasons, particularly Dussera, Diwali, Akshaya Trithya and during the wedding season in India.
- **Change in duties & levies:** The domestic price of Gold may deviate from international prices due to domestic duties and levies such as customs duty, sales tax, VAT etc. These duties and levies are charged by the Central/State Governments in India and may change from time to time. The Scheme's NAV is computed on the basis of the domestic price and any change in domestic duties and levies will impact the domestic price of gold.
- **Fluctuations in INR/USD reference rate** – The domestic price of gold is exposed to currency fluctuations (INR-USD). International prices in Gold are denominated in US Dollar while domestic prices are obtained in Indian Rupees after applying the INR/USD conversion factor. All other factors remaining the same, domestic gold prices will increase if INR depreciates against the dollar and vice-versa.

b. Money Market in India

Money Market in India

The money market is a key component of the financial system as it is the fulcrum of monetary operations conducted by the central bank in its pursuit of monetary policy objectives. It is a market for short-term funds with maturity ranging from overnight to one year and includes financial instruments that are deemed to be close substitutes of money. Money market instruments facilitate transfer of large sums of money quickly and at a low cost from one economic unit (business, government, banks, non-banks and others) to another for relatively short periods of time. RBI has been taking active steps to develop the money market in India with the objective to improve the signaling mechanism for monetary policy while ensuring financial stability. Various reform measures have resulted in a relatively deep, liquid and vibrant money market with a shift from administered

and direct to indirect market based instruments of monetary management. For e.g. the call money market was transformed into a pure interbank market, while other money market instruments such as market repo and Tri-party repo were developed to provide avenues to non-banks, including mutual funds, for managing their short-term liquidity mismatches. The money market in India consists of the following instruments; treasury bills, commercial papers, certificates of deposits, call money, term money, Tri-party repo, bill rediscounting etc. The money market in India consists of the following instruments; treasury bills, commercial papers, certificates of deposits, call money, term money, Tri-party repo, bill rediscounting etc.

D. WHERE WILL THE SCHEME INVEST?

- I. Atleast 95% of the corpus of the Scheme will be invested in IDBI Gold Exchange Traded Fund.
- II. The Scheme may also invest up to 5% of its net assets in Reverse repo/ short-term fixed deposits/ Money market instruments including Commercial Paper, Certificates of Deposits, Treasury Bills/Securities, Tri-party repo, reverse repo or IDBI Liquid Fund Scheme to meet the liquidity requirements or to meet expenses arising in the scheme. . Presently we propose to carry out reverse repo transactions only in Central Government Securities, State Government securities and T-Bills. The Scheme may also hold cash from time to time.

E. WHAT ARE THE INVESTMENT STRATEGIES?

i) Investment Strategy

The Fund shall be managed in line with the Investment Objective to generate returns that correspond closely to the returns generated by IDBI Gold Exchange Traded Fund and the annualized tracking error is expected to be maintained within 2%. To realize this objective, the investment strategy of the Scheme would be to invest passively in IDBI Gold Exchange Traded Fund. The Scheme will remain invested in the underlying scheme regardless of the prevailing gold price or future outlook for this asset class. However, the performance of the Fund will also be impacted by the delay in receipt of application money.

The table shows below the impact on fund performance as a result of delay in receipt of money over previous 2 months of IDBI Gold ETF.

% difference in prices between 'n' days	2 Days	3 Days	4 Days	5 Days	6 Days	7 Days
Average	0.52%	0.72%	0.90%	1.07%	1.26%	1.52%
Max	3.17%	4.38%	4.56%	4.45%	4.88%	5.41%
Min	-1.82%	-1.67%	-1.47%	-1.54%	-1.24%	-1.45%

The above table is only for reference and the actual impact may vary based on the actual price movement of the underlying security.

ii) TRACKING ERRORS

Tracking errors are inherent in a passively managed fund and such errors may cause the scheme to generate returns, which are not in line with the performance of the designated benchmark. Tracking error, in respect of this Scheme, is defined as the annualized standard deviation of the difference in returns between the Scheme and that of the underlying benchmark (domestic price of physical gold). Tracking error in the Scheme may arise due to various factors including but not limited to –

1. Annual recurring expenses charged by the Scheme and the underlying scheme including investment management fees, custodian fees, taxes, levies, etc

2. Delay in deployment of cash by the Scheme or the underlying Scheme. The Scheme may delay deployment of cash in underlying scheme if the cash is not adequate enough to invest in creation unit size required by the underlying Scheme. Cash holding and accrued income both in the Scheme/underlying scheme can also contribute to the tracking error.
3. The underlying scheme may buy or sell gold at different points of time during the trading session at the then prevailing spot prices which may not correspond to the closing price used for computation of NAV of the underlying scheme.
4. Transaction costs that may be incurred if the Scheme purchases units through the Stock Exchange mechanism for smaller lot sizes
Tracking error can also be caused by late realization of cheques /demand drafts. However cheques in the normal course of banking would take 2/3 days for realization. Hence the investment can be done only on the 3rd or 4th day depending upon the timing of the credit in the Scheme account, as explained below.

a) Banking of Funds

Following are the various modes of payments for Purchase/Additional purchases and SIP transactions for IGFOF:

S No	Name	Particulars
1	Real Time Gross Settlement (RTGS)	Any investor can transfer funds thru RTGS for amounts exceeding Rs.2 Lacs within the stipulated cut off time prescribed by the Bank.
2	National Electronic Funds Transfer (NEFT)	Any investor can transmit funds thru NEFT Mode for amounts less than Rs.2 Lacs or such higher/lower limit as may be specified by RBI. NEFT transaction can be initiated through the internet banking account also.
3	Electronic Clearing System (ECS) / National Automated Clearing House (NACH)	This is possible through branches of banks enabled with ECS/ NACH facility.
4	Auto Debit	The list of banks with whom the Mutual fund has made arrangements for this facility is available in the application form. The Funds are generally credited to Scheme account on the same day. This facility is carried out on the basis of mandate given by the Investor and often used for SIP transactions.
5	MICR	Magnetic Ink Character Recognition (MICR) line on a cheques has embedded information about the bank, branches etc. which allows for automated processing of instruments, which enabling speedier clearance
6	Transfer instruments	An Investor maintaining an account with the bank, where the scheme is also maintaining account, the transfer of funds takes place simultaneously and the Fund movement takes places in a seamless manner.
7	Cheque Truncation System (CTS)	Image-based clearing system undertaken by the Reserve Bank of India

b) Following are the various modes of payments for Purchase/ Additional purchases and SIP transactions for the Scheme:

Sr. No.	Payment Mode	Clearing
1	RTGS	Same Day
2	Transfer Instrument	Same Day
3	Auto Debit	Same Day
4	NEFT	Same Day or the next business day
5	ECS/ NACH	One/Two days or Five/seven days (Depending on the clearing cycle of that particular location)
6	MICR	Two days but in some cases 3-7 Days

The cash flow through various modes of acceptance will be analyzed on a daily basis. Investment into units of IDBI GOLD ETF would be on the basis of this cash flow analysis & subscription/ redemption request received. Subsequent deployment into IDBI GOLD ETF would also be based on this analysis. The deployment will be carefully planned on the basis of the mode of acceptance of instrument with an objective to moderate tracking error.

To illustrate – A cheque of Rs 10,000 received on T day in the Scheme would result in the investor getting the NAV of T day as per extant guidelines. The said cheque would be realized only on T+2/3 and hence the fund would invest in IDBI GOLD ETF units on T+2/3 as the case may be. There could be underlying price movements in IDBI GOLD ETF between T day and T+3/4 day. This could result in tracking error. To that extent the performance of scheme shall be at variance with that of the underlying scheme. However, over periods of time it may get evened out. .

c) The table below highlights the Clearing Mechanism of the funds based on various modes of payments *vis-à-vis* different types of location for lump sum/SIP investments:

Location/Mode of clearing	RTGS	NEFT	NACH	CTS Cheques
Tier I	T day	T day up to 6.00 pm, Otherwise T+1	T Day to T+3 days	T+2 to T+3 days
Tier II				
Tier III				
Tier IV				

d) The table below highlights the percentage of funds received through Systematic Investments Plans from various modes of payment:

Date	Trade Date	% of funds received	Cumulative %
SIP Date (T)	T Day	99.27	99.27

	T+1	0.34	99.61
	T+2	0.22	99.83
	T+3	0.05	99.87
	T+4	0.02	99.89
	T+5	0.01	99.90
	T+6	0.01	99.91
	T+7 & Above	0.09	100.00
Total		100.00%	

As per the above table almost 99% of credit is happening into our account by T+2.

The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.

The Fund Manager will either execute trade for the units of IDBI GOLD ETF on exchange or subscribe directly to IDBI GOLD ETF (direct via AMC) depending on market dynamics in the best interest of the investors.

- Tracking error could be the result of a variety of factors including but not limited to:
- Delay in the purchase or sale due to market illiquidity.
- Availability of Gold bars for creation of units of IDBI GOLD ETF.
- Delay in receipt of subscription/SIP inflows.
- Fund flows in the Scheme of value lesser than Creation lot size of IDBI GOLD ETF.
- The trade execution prices for units of IDBI GOLD ETF may be different from NAV of IDBI GOLD ETF.
- The holding of a cash position and accrued income.

Tracking error due to movement in prices of physical gold will impact the performance of the Scheme.

g) Measures to reduce Tracking Error

The Scheme will endeavor to keep tracking error as low as possible by:

- Appointing leaders in bullion business as Authorized participants/ Market Makers under IDBI GOLD ETF to enhance liquidity on the stock exchange and reduce the impact cost and that will help the Fund to minimize tracking error.
- appointing leading bullion banks to make gold bars available for creation of units under IDBI GOLD ETF
- Estimate the inputs regarding cash flows by various modes of acceptance on a daily basis. The subscription/redemption request will also be reported and used as a basis for planning investments in IDBI GOLD ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.

- For small amounts of inflows/outflows which are less than the creation size of IDBI GOLD ETF, the Scheme will buy/ sell IDBI GOLD ETF units directly on the stock exchange without waiting for additional subscription/redemption to minimize tracking error.
- Offsetting the expenses/interest against the net inflows/ outflows and investing/ redeeming the balance amount from IDBI GOLD ETF to minimize the tracking error in best interest of investors.

The Mutual Fund shall endeavor to keep the annualized tracking error lesser than 2% (annualized) at all times. However, at times due to the variations in the recurring expenses/transaction costs incurred by the scheme and/or cash holding in the Scheme the tracking error may exceed the 2% limit (annualized) mentioned above.

iii) **Portfolio Turnover**

Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. Due to the inherent nature of the Scheme, it is expected that there could be regular subscriptions and redemptions on an ongoing basis. In view of the above, it will be difficult to provide an estimate/range with a reasonable measure of accuracy for the anticipated portfolio turnover in the Scheme, but it will be the endeavour of the fund manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the scheme and purchase/ redemption transactions on an ongoing basis in the scheme.

iv) **Risk Control**

The Mutual Fund has built adequate internal risk management controls and safeguards to ensure that the Scheme is managed in line with the defined investment objectives and in compliance with SEBI (MF) Regulations. The AMC will monitor the tracking error on an ongoing basis and review the performance against the benchmark index and peer group regularly.

To seamlessly facilitate STP between two Schemes of the Mutual Fund, the investor must comply with the redemption requirements of the transferor scheme and subscription requirements of the transferee scheme.

The Scheme offers STP facility subject to following terms & conditions:

In case the STP, date falls on a non business day, then the next business day shall be considered for the purpose of determining applicability of NAV.

3. Minimum balance in the source (transferor) scheme should be Rs. 25,000 at the time of enrollment for STP.

9. The unit holder who has opted for STP under a specific scheme can also redeem or switch his units to any other eligible scheme provided he has sufficient balance in his account on the date of such a request.

11. The facility will be automatically terminated if the units under the transferor scheme are pledged or upon receipt of intimation of death of the Unit holder.

12. The application for start of STP should be submitted to Official Point(s) of Acceptance at least 7 days before the date of commencement / start date of STP. 6. The redemption under SWP will be subject to applicable Exit Load.
7. The application for start of SWP should be submitted to Official Point(s) of Acceptance at least 7 days before the date of commencement / start date of SWP. D. COMPUTATION OF NAV

The Mutual Fund shall compute the Net Asset Value (NAV) of each scheme in accordance with SEBI (Mutual Funds) Regulations, 1996. The NAV of the Scheme (for all Plans/ Options) shall be calculated on all business days announced by the next Business Day by 10.00 a.m.

The NAV of the Scheme will be rounded off to 4 decimal places. Units in the Scheme will be rounded off to 3 decimals.

The NAV of the Scheme shall be updated on AMFI's website (www.amfiindia.com) and the Mutual Fund's website (www.idbimutual.co.in) by 10 a.m. of the next business day.

The Net Asset Value per Unit shall be calculated by dividing the Net Assets of the scheme by the total number of Units outstanding on the valuation date, as follows:

NAV = [Market or Fair Value of the Scheme's Investments + Current Assets including accrued income - Current Liabilities and Provisions including accrued expenses] / No. of Units outstanding under the Scheme / Plan

The Redemption Price however, will not be lower than 95% of the NAV or as permitted /prescribed under SEBI Regulations from time to time. The Mutual Fund may charge the load within the stipulated limit and without any discrimination to any specific group of unit holders. However, any change at a later stage shall not affect the existing unit holders adversely.

Methodology for Calculation of Sale and Re-purchase price of the units of mutual fund scheme

a) In case of Purchase of mutual fund units

As per existing regulation, no entry load is charged with respect to applications for purchase / additional purchase of mutual fund units. Therefore, Computation of Sale Price is as below-

NAV	10.00
Entry Load	Not applicable
Sale Price	10.00

This also means, **Sale Price = NAV as on date of investment**

b) Redemption/ Repurchase of mutual fund units

In case of redemption, repurchase price is calculated as below

Repurchase Price = NAV as on date of redemption- exit load (if applicable)

c) **Illustration showing how repurchase price is calculated under 2 different scenarios-**

Amount Invested- Rs.10,000/-

Date of Investment- 1st April 2018

NAV as on date of investment- Rs.10/- per unit

Exit load- For exit on or before 12 months from the date of allotment- 1%
For exit after 12 months from the date of allotment- Nil

No of units allotted at the time of purchase

$$= \frac{\text{Amount invested}}{\text{NAV of the scheme on the date of investment}}$$

$$= 10,000 / 10 = 1000 \text{ units}$$

Particulars	Scenario I	Scenario II
	Redemption during applicability of exit load	Redemption in case of Nil Exit load
Date of Redemption	On or before 31 st March 2021	After 31 st March 2021
NAV as on date of redemption	Rs.12	Rs.12
Applicable Exit load	1%	Nil
Repurchase Price (NAV as on date of redemption-Exit load)	Rs.12 - (Rs.12*1%)	Rs.12- (Nil)
Repurchase Price on date of Redemption	Rs.11.88	Rs.12
Redemption Amount payable to investors (no of units allotted x Repurchase Price)	Rs.11.88 x 1000	Rs.12 x 1000
	= Rs.11,880/-	Rs.12,000/-

Note- This is only for illustration purpose. Actual Exit load charged in the Scheme may vary.

The above mentioned example does not take into consideration any applicable statutory levies and taxes.
